

Sprint 3 Planning

Duration: July 15–22, 2025

Participants: Solo Developer – Enisa Saiti

Sprint Goal:

Enhance usability by adding task search, remaining task indicators, and auto-refresh when new tasks are added.

Planned User Stories

- *As a user, I want to search tasks by title or filter by priority so I can find important tasks quickly.*
- *As a user, I want to see how many tasks are left so I can manage time.*
- *As a user, I want new tasks to appear instantly so I don't need to refresh the page.*

Story Details

PTM7 – Search/Filter Tasks

As a user, I want to search tasks by title or filter by priority so I can find important tasks quickly.

Acceptance Criteria:

- Text input filters by task title (case-insensitive)
- Dropdown allows filtering by priority (planned for Sprint 4)
- Filters combine when both are used

PTM8 – Remaining Tasks Counter

As a user, I want to see how many tasks are left so I can manage time.

Acceptance Criteria:

- Non-"Done" tasks are counted
- Count displayed near the top of the list

PTM9 – Instant Task Display

As a user, I want new tasks to appear instantly so I don't need to refresh the page.

Acceptance Criteria:

- Use Angular signal or event to notify TaskList
- Task appears immediately after submit
