

Sprint 1 Planning

Duration: July 15–22, 2025

Participants: Solo Developer – Enisa Saiti

Sprint Goal:

Build core task creation and viewing functionality to establish the base of the personal task management system.

Planned User Stories

- As a user, I want to create a task with a title and due date so I can manage my to-do list.
- As a user, I want to view all my tasks grouped by status (To Do, In Progress, Done) so I can track their progress.
- As a user, I want to delete a task I no longer need so I can keep my list clean.

Story Details

PTM2 – Add New Task

As a user, I want to add tasks with a title and due date so I can track what I need to do.

Acceptance Criteria:

- Task title input field
 - Optional due date
 - Submit button adds task
 - Task saved to LocalStorage
-

PTM3 – View Tasks Grouped by Status

As a user, I want to see tasks grouped by their status (To Do, In Progress, Done).

Acceptance Criteria:

- Group tasks visually by status
 - Each group renders separately
 - Status field included in task model
-

PTM4 – Delete Task

As a user, I want to delete tasks I no longer need.

Acceptance Criteria:

- Delete button next to each task
- Task is removed from UI and LocalStorage
