

Sprint 1

Sprint 1 – Summary

Sprint Goal:

Set up the Angular application and implement basic task features: creation, list view, and deletion.

Completed User Stories

- As a user, I want to create a task with a title and due date so I can manage my to-do list.
- As a user, I want to view all my tasks grouped by status (To Do, In Progress, Done) so I can track their progress.
- As a user, I want to delete a task I no longer need so I can keep my list clean.

Features Implemented

- Task creation with title and due date
- Display tasks grouped by status
- Delete task button
- LocalStorage persistence
- Connected codebase to GitHub
- Jira board + Confluence structure created
